

Pump up your pool parties, beach days, summer holidays, festivals and even showers with our IPX7 Waterproof Bluetooth Speaker. This powerful and durable 10 watts speaker is fully waterproof, drop-proof and shock-proof.

Model: BTW80

IPX7 Waterproof Bluetooth Speaker

Features

- This IPX7 speaker can be immersed one metre underwater for up to 30 minutes without any interferences in the quality of the speaker
- The sleek, unique shape of the speaker provides immersive 360° sound meaning you can place it anywhere at any angle to hear consistent sound output
- The two acoustic drivers give off a deep bass response and stylishly vibrate to the tunes
- Connect via Bluetooth or aux-in with your compatible handheld devices including smartphones and tablets
- The TWS true wireless pairing will connect your device amongst two IPX7 Waterproof Bluetooth Speakers at the same time to create the ultimate stereo sound, with left channel and right channel playing through each of the speakers, within a massive 10 metre range
- The fun will be sure to last all day on a full charge with a battery life up to 14 hours and a full charge time of 5 hours
- The controls on the speaker are straightforward – power, increase and decrease the volume, previous and next playing track, and pause and play the tracks
- The IPX7 Waterproof Bluetooth Speaker comes in the colours blue or black with matching modern, textured fabric and a black carry string
- Why not pick one of each colour to pair both at the same time with the unique stereo sound at your next splashy outdoor gathering?
